## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, drawn to an immobilized catalytic system.

Group II, claim(s) 15-23, drawn to a microencapsulated catalytic system.

The inventions listed as groups I and II do not relate to a single general inventive Concept under PCT Rule 13.1, because under PCT Rule 13.2 they lack the same or corresponding special technical features for the following reasons: Group I is directed to an immobilized catalytic system that involves a carrier layer and Group II does not require this limitation. Group II requires a central core and Group I does not involve this limitation. Therefore, there are two different products recited and under Rule 13 Applicant is entitled to one product, a process for manufacture of the product and a use of said product. Therefore, Groups I and II lack unity.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for other restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
